

LOADOUT: STREET CATALOG

Before your *:Otherscape* characters embark upon a dangerous job, it's crucial to prepare specialized gear. The following tables contain the **Street Catalog**, featuring general and specific items that could be acquired and added to your loadout theme (see page 114).

These represent some of the more commonly used pieces of gear in the Megacity, for people such as the PCs (and their opposition), unless the MC says otherwise. New *:Otherscape* sourcebooks, such as *Tokyo:Otherscape*, present their own local Street Catalogs.

GENERAL AND SPECIFIC ITEMS

Each catalog section lists general items and specific items. **General items** are tags that describe the items typical to the category in broad strokes, with suggestions for features and flaws to mix and match as you see fit. As a reminder, every item (a single tag or a set of tags) can have one weakness tag, added by the MC or the player.

Specific items are individual products or services, with a name and a description, a set of 3 to 4 loadout tags, and a loadout weakness tag. The first loadout tag is always the item's name and is applicable whenever the item is useful; the second and third describe additional features or add-ons, that are relevant only in specific situations; and the fourth tag represents an entirely different aspect of the item or a quirk that it has such as an unusual way or approach of using the item, an emotion it evokes in its user or in others. A specific item might look like this:

ITEM NAME	DESCRIPTION	FEATURE TAGS	WEAKNESS
Gorts & Jasper KS-125 "Kiss Kiss" High-Precision Rifle	A long-range rifle known for its reliability and modular design.	<i>high precision rifle, long range, telescopic thermal sight, reliable</i>	<i>hard to conceal</i>

LOADOUT THEME SPECIALS

When a loadout theme gets an upgrade (**Loadout Theme Upgrades**, page 134), the player may choose one of the following Specials to add to the theme.

☐ **Deeply Customizable:** Choose one item in your loadout theme. Once per downtime, you can add to your loadout theme a loadout tag that represents a feature or add-on of that item that can be used under specific conditions or for a specific purpose.

☐ **Fully Decked:** Pick a category in the Street Catalog. You now have all of its tags in your loadout theme and may activate any of them when Loading Up. This may be chosen multiple times for different categories.

☐ **Got A Spare?:** Once per session, you can duplicate a Loaded Up loadout tag representing a non-unique item and give that copy to one of your crew members or allies, while keeping yours.

☐ **Modded Out:** Once per session, when you roll with three or more positive loadout tags from the same set, you can swap a miss (6-) result with a mixed hit (7-9), or a mixed hit (7-9) with a strong hit (10+).

☐ **Repurpose:** Once between Loading Up and Loading Off, you may rewrite a Loaded Up loadout tag. It remains in its new version going forward.

☐ **Return Policy:** Once per downtime, you can replace one of the loadout tags in your loadout theme with a different one.

☐ **Spread the Wealth:** Your crew members may use your power tags when taking action to procure new items for their loadout theme (provided your power tags are relevant). You or other crew members cannot use the same tag in your procurement actions if they are happening at the same time.

☐ **Synergetic Gear:** Once per session, when you roll with three or more positive loadout tags representing different items, you can swap a miss (6-) result with a mixed hit (7-9), or a mixed hit (7-9) with a strong hit (10+).

ACCESS & PERKS

These are types of accesses or privileges that last only a short time, or can be used only on a specific job.

Finding an appropriate supplier for a perk can sometimes be more difficult than finding other loadout items, because you're typically looking for something specific: the schematic of the Epis bunker, blackmail material over the hacker DeeZ, etc. The MC can represent this increased difficulty with a status affecting the procurement action. On the other hand, some groups would like to keep things looser; perks are an excellent way to use up wildcard loadout tags, when in the middle of a Domain break in you suddenly pull out the digital backdoor access you've "prepared beforehand".

Perk tags that are about access and availability are commonly used in quick outcomes to get into places. Others, which are about assistance and support, might be used with **Create** or **Enhance** to present something new to the scene, or **Restore** to safely recover.

A common Consequence while having a perk is simply losing it (burn tags).

GENERAL ITEMS

Items: *blackmail material, bribed bouncer, building schematics, VIP area access*

Features: *group pass, hard-to-trace source, status symbol*

Flaws: *conspicuous, recurring fees, unverified*

ITEM NAME	DESCRIPTION	FEATURE TAGS	WEAKNESS
Certified corp ID	You obtained a legit corporate ID for accessing proprietary systems. It's not yours. Hope nobody misses it!	<i>certified corp ID, access to proprietary systems, access to corporate grounds</i>	<i>full authentication also requires PIN</i>
Digital backdoor access	A one-use code into a secure part of a Domain.	<i>digital backdoor access, silent entry, leaves no trace, administrative privileges</i>	<i>short window of opportunity</i>
Emergency treatment call	A rapid response medical team is standing ready to serve you.	<i>emergency treatment call, from missing limb to radiation poisoning, evacuation support, the situation is under control</i>	<i>hesitant to enter restricted areas</i>
Hacker on call	A hacker owes you a favor, or perhaps you've paid for their time.	<i>hacker on call, infiltrate a system, provide Harnessing assistance, cyber-space news</i>	<i>"Let me do my job"</i>
Private VR Domain	A private spot for meeting folks in VR with rotating encryption to ensure it remains invite-only.	<i>private VR domain, hidden in cyber-space, quick access, bespoke avatar</i>	<i>short-term lease</i>
Safehouse	You've secured a private, off-the-books location just in case things go badly and you need to lie low.	<i>safehouse, off-the-books location, emergency supply stash</i>	<i>a bit too far</i>
Smart car service	Subscription services for drone vehicles don't give you the most impressive wheels in the Megacity but the convenience is hard to beat.	<i>smart car service, sit back and relax, accepts custom routes</i>	<i>mundane use only</i>

AMMO

Different types of ammo can be incredibly useful in a world full of different kinds of foes, but while specialist Mythic ammo exists (see for example **Weapon Witching**, page 231), it's a rarity.

For simplicity's sake, all ammo can be assumed to fit the kind of weapon the PC is usually carrying.

Ammo tags can be used to augment attack actions with weapons that use that ammo, or for rolls to reload (quick outcome) or mitigate Consequences of running out of ammo (such as burning tags or a *running-out* status). See "Supply Issues" under **Common Tech & Gear Statuses**, in the *Action Database*.

Ammo can be treated as a consumable tag (**Consumable Story Tags**, page 113). When a consumable item is consumed entirely in an action, the player should burn its tag for Power to reflect the greater effect derived from its one-time use (**Burning a Tag for Power**, page 122). Consumable tags can also be used normally to provide 1 Power per tag, in which case it is assumed the PC is rationing the use of this consumable item to gain multiple uses with smaller effect.

A common Consequence when using ammo is running out (burn tags).

GENERAL ITEMS

Items: *adhesive rounds, armor-piercing ammo, explosive cartridges, extra clip, high stopping power ammo, hollow points, non-lethal rounds, speed loader, tracer rounds*

Flaws: *contains duds, easy to misplace, heavy, highly volatile, slow to reload*

ITEM NAME	DESCRIPTION	FEATURE TAGS	WEAKNESS
Fenix Corp Anti-Mechanoid Rounds	These specialized bullets can still damage a human but the internal EMP, conductive jacket, and piercing design are especially brutal against drones and cybernetics.	<i>anti-mechanoid rounds, localized electromagnetic pulse, armor-piercing, disrupt network connection</i>	<i>weak against humans</i>
Fenix Corp Tagger Rounds	These special rounds do not attempt to harm their target, and instead adhere to it. They send an encrypted GPS signal so the subject can be tracked.	<i>tracking rounds, encoded signal, tiny and silent</i>	<i>weak signal</i>
Kojima Security Tech M7 Electrostun rounds	These non-lethal rounds combine the blunt force of rubber bullets with the neutralizing power of a taser. Unlike these, they work well through armor.	<i>electrostun rounds, wet targets, ignores standard armor, flashy and loud impacts</i>	<i>grounded target</i>
Kojima Security Tech M8 Armor Piercing Bullets	These elongated bullets with high density cores are found in military supplies throughout Asia and, thanks to the black market, among criminal gangs too.	<i>armor piercing bullets, break through concrete, pierce through lined up targets</i>	<i>ineffective at long range</i>

APPS, CHIPS & DATABASES

An app is any software that is run on one's device or neural computer. "Chips" is a catch-all term for a variety of thumb-sized devices that can provide new capabilities to one's cyberware while plugged in.

KOCMOC (page 49) sells hundreds of types of chips that make a person's cybernetic parts act without the need for mental command or skill, ranging from insta-mastering the latest dancing craze to just doing the dishes. Databases are not simply tables full of information, but also indexes and search UI that should usually be wired into one's HUD – either visor or neural – to be truly effective.

App tags can reinforce other activities or provide new functionality. Chips especially can allow a PC to roll something they might otherwise be unable to, such as speaking in a language they don't know. Databases are useful when trying to come up with answers, or analyzing a situation.

A common Consequence with software is having it *glitch*. A common Consequence when using chips is getting an unintended result – even military spec chips can't handle every situation a merc might find themselves in.

GENERAL ITEMS

Items: *cheap Harnessing app, Epis office tools, KOCMOC [mundane skill] chip, most wanted database*

Features: *adaptive design, insta-loader, memory saver, smart search*

Flaws: *distracting notifications, doesn't play well with others, glitchy, memory guzzler*

ITEM NAME	DESCRIPTION	FEATURE TAGS	WEAKNESS
Drone operator HUD	A heads-up display giving detailed read-outs on drone performance and response, available from a variety of vendors and for a variety of devices.	<i>drone operator HUD, drone safety protocols, auto-pilot programming, access sensory data</i>	<i>divided attention</i>
Emotive damper	A software that runs on neural implants. Overrides the brain's emotional centers to temporarily interrupt their signal. You still feel the emotions but your expression is blank.	<i>emotive damper, poker face, display desired emotion</i>	<i>strong emotions are hard to surpass</i>
Gorts & Jasper Integrated Weapons Link	A paired weapon accessory and HUD (attachable to visor or eye implant), this technology calculates optimal firing angles, and presents ammo management and aiming reticles.	<i>weapons link, precise aim at small targets, trick shots, movement tracking</i>	<i>visual data overload</i>
MentalMap Geographic Database Subscription	A detailed mapping software hardwired into your brain implant or AR display, including a GPS connection.	<i>geographic database, realtime GPS guidance, various info layers, reviewer recommendations</i>	<i>everything private is censored</i>
MentalMap Language and Culture Assistant	With so many different languages and cultures floating around the Megacity, it's handy to have an AI silently helping you not to insult the wrong person.	<i>language and culture assistant, cultural advice, sound like a native speaker</i>	<i>communicate complex concepts</i>

ITEM NAME	DESCRIPTION	FEATURE TAGS	WEAKNESS
Nu-Phase Body Snatcher	Released to the market without proper experimentation (so they say), this chip bundle allows two users to link their visual fields and other sensory inputs, and share apps.	<i>neural sensory and app linking, access each other's apps, coordinated movement, haptic linking</i>	<i>disorienting lag</i>
Santos-Krupp Medical Database IV	A full medical reference database integrated with full sensory support and visual HUD indicators.	<i>medical database, diagnose according to physical metrics, first aid support, excuse me I'm a doctor</i>	<i>doesn't know Mythoi</i>

ARMOR

Given the situations mercs commonly find themselves in, it's considered standard practice amongst most to wear some kind of body armor or protection.

Armor can range from reinforced clothing to a full-metal battlesuit. Most armors take some time and effort to don or doff, and some even require an assistant to help.

Armor tags can be used to mitigate incoming injuries, although many have additional features that are useful in specific situations.

A common Consequence when wearing armor is having it break (burn tags).

GENERAL ITEMS

Items: *arctic survival jumpsuit, bullet-proof vest, corpwear armored suit, fire-retardant suit, reinforced duster, threat scanner*

Features: *armored gloves, ballistic inserts, helmet, hidden pouch, inconspicuous, riot shield*

Flaws: *ablative, heavy, susceptible to [attack type]*

ITEM NAME	DESCRIPTION	FEATURE TAGS	WEAKNESS
Fenix Corp Electronic Warfare Suit	Popularized by an amateur designer and street mercenary, this protective jacket comes with peripheral plugins and signal jammers.	<i>electronic warfare suit, disrupt cyber attacks, peripheral plug-in ports, flak jacket material</i>	<i>battery drains quickly</i>
Lexington Arachnis Camouflage Suit	This full body suit's main feature is an active camouflage mesh that grants chameleon-like invisibility, allowing the user to blend with their environment.	<i>camouflage suit, best when standing still, Kevlar protection, thin and light</i>	<i>slow adaptation</i>
Lexington Sherwood Tactical Vest	This flexible, reinforced carbon nanofiber vest is designed to stop blades and bullets alike. It's easily foldable and surprisingly lightweight, which made it one of the most common armored vests in use.	<i>tactical vest, blade resistance, ballistic resistance, foldable and lightweight</i>	<i>only covers the chest</i>

ITEM NAME	DESCRIPTION	FEATURE TAGS	WEAKNESS
UrbanWar Riot Armor	This armor-helmet combination made of polycarbonate platings is modeled after the everyday protective suits used by police worldwide.	<i>riot armor, sturdy, helmet-mounted display, stand aside I'll handle this</i>	<i>bulky</i>
UrbanWar "Urban Assault" Lightweight Base Jumping Armor	Constructed with smart materials and reinforced with "super-silk", this suit can equip webbing between the arms and legs to allow high-velocity gliding through the Megacity.	<i>base jumping armor, retractable parachute, webbings, daredevil</i>	<i>high winds</i>

BODY ATTACHMENTS & CYBERNETICS

Cybernetics appearing in this catalog are not permanent fixtures of the PC's body, but temporary modifications. Still, some can be quite difficult to apply or remove and might require an operation lasting an hour or more.

Permanent cyberware can nonetheless be represented by loadout tags. Burnt cyberware loadout tags can stand for cybernetics that must go through some form of activation to become useful at a superhuman level (whether maintenance, charging, tuning, etc.). Or, they can simply represent implants of secondary importance that won't be a focal point in the coming job, even if narratively they retain their full usefulness (imagine a TV series about a protagonist with cyberware but in some episodes we don't see them activate it).

Cyberware tags empower the specific activity they were designed for (super acute eyesight), or allow for a completely new activity (speaking through radio). Most require active use but others, such as dermal plating for example, are used in mitigation of incoming harm.

A common Consequence with cybernetics is having it *overheat*, *glitch*, or even misbehave in a way that *injures* their user.

GENERAL ITEMS

Items: *aesthetic appendage, blood toxin filters, boosted nervous system, brain accelerator, built-in Harnessing console, comms implant, cyber ears, cyber eyes, cyber legs, cyber tail, cyber wings, cyberarm, exo-skeleton, extra limbs, face-altering mesh, hand-eye link, internal scanner array, neural link, neural visor*

Features: *appears organic, durable materials, EMP shielding, firmware updates, high-end software, impressive, internal firewall, long battery life, powerful servo-motors, reliable, retractable [weapon or device]*

Flaws: *draws attention, glitchy, heavy, neural noise, scar tissue, unwieldy*

ITEM NAME	DESCRIPTION	FEATURE TAGS	WEAKNESS
Apex CN62-s Power Legs	This thin, light synthetic exoskeleton is mounted on the legs, providing improved running, jumping, kicking, and swimming capabilities.	power legs , enhanced jump, continuous effort, confident gait	aches and pains
Apex VI-80 “Halcón” Wings	These striking wings unfold from shoulder-mounted storage with lightweight metal frames and carbon fiber “feathers.” Popular among thrill seekers.	wearable wings , slow gliding, compact design, thrill seeker	at the whim of winds
Elysian Blades Retractable Quick-Blade	A flat forearm bracer with a retractable blade, released or retracted with muscle control.	retractable quick-blade , quick stabbing motion, hidden in bracer, surprise factor	fragile blade
Epis Cranius Headcomms	This tiny comm device is placed in the ear and integrates with visors and implants for sending and receiving audiovisual messages. Includes subvocal mic for very quiet responses.	head comms , private network, range booster, quiet discussion	too much chatter
Fenix Corp Carbon Dermal Plating	Figure-hugging carbon fiber protection bonded to the host’s skin which can deflect weapons, bullets, abrasive environments and more.	dermal plating , deflect melee weapons, shielded vitals	weak to bludgeon trauma
Navachar Electronics “Nazar” Multispectral Lens	The new industry standard, this contact lens allows its user to see in visible, thermographic, ultraviolet, and other specialized wavelengths, including zoom and microscopic.	multispectral lens , zoom and microscopic vision, video recording	visual overload
Osprey Enhanced Carbon Fiber Muscles	Dense, semi-synthetic muscles custom grown on a carbon fiber mesh for each host and attached to the body in a one hour surgery. Greatly increase strength, but rot and drop after about a day.	carbon fiber muscles , enhanced stamina, push to the limits, don’t mess with me	overreach and harm yourself
Shielded thoracic cover	Popular among smugglers and other semi-legal professions, this synthetic skin compartment is adhesive to the skin, placed over a small item to hide it from scanners.	shielded thoracic cover , avoids most scans, shock-absorbing memory foam	bouts of pain
Talonwerks XR-11 High Capacity Nerve Overcharger	Talonwerks has long set the standard for nerve boosting. This button-sized device is attached to the back of the neck, improving reaction time.	nerve overcharger , precision movement, super quick reflexes, programmable movement	muscle spasms

CYBERSPACE

This category includes everything to do with bridging the network, for whatever reason (usually it's to do some damage, let's be real here).

As such, it includes hacking software, electronic warfare devices, and even services that aid the hacker in attacking, defending, or simply existing online.

Some of these tags can only be used in cyberspace, to navigate, interact with, or change digital constructs or the environment itself. Cyberspace is built on top of meatspace, however, and so electronic warfare tags can be used when tracing or jamming opponents, or when trying to prevent them to do the same, while in the physical world. See also **Cyberspace** in the supplement: *Otherscape Action Database*.

Common Consequences with hacking software are having it *glitch* or make the system *alert*, or possibly *tagging* the PC.

GENERAL ITEMS

Software: *brute force app crasher, code analyzer, comms tap, credentials forger, decryptor app, deepfake app, firewall, firewall buster, hacker brain-fryer, malcode remover, proxy service, security-disabling virus, source tracer & locator*

VR Models: *[object]-shaped VR construct, [persona]-shaped avatar, environment editor, VR clone tool, VR invisibility app, VR shield, VR weapon*

Features: *fast loading, innocuous signature, low requirements, robust coding*

Flaws: *consumes resources, easily traced, glitchy, illegal, signature code, takes a moment to load*

Hardware: *"anywhere" satlink, comms implant, computing device, crystal-state datadrive, custom carryall, datapad, electronics workbench, Harnessing console, neural net, signal jammer, surge protector, VR goggles*

Features: *burner, EMP shielding, heatsink coolant rig, integrated firewall, lots of RAM*

Flaws: *easily overheats, janky graphics, one generation behind, phantom signals, weak battery*

ITEM NAME	DESCRIPTION	FEATURE TAGS	WEAKNESS
Astra-10 Electronic Blanket	This small device shields signals in a small radius, making all digital activity inside the zone undetectable from the outside.	electronic blanket emitter , disable incoming signals, provide false sensory reading	highly affected by metal
Astra-10 Personal Security Field Spammer	While Astra-10 bills these as protective devices against being attacked by hostile drones they are more often used for vicious Denial-of-Service attacks.	EM field spammer , denial of service attack, disable drones, disable AR	overheating
Gordian Exploiter	A popular decryption program that is methodical and subtle in its approach.	crypto-breaker software , subtle touch, leave to soak all night	takes time to set up
Harness overclocking mods	Open source mods for pushing Harness softwares past their design limits, used by the coder when creating or adjusting avatars.	Harness overclocking mods , create peak performance avatar body, grant OP ability	must pick from pre-designed templates
Nu-Phase Kicker Console	For those serious about digital security nothing beats the Kicker, a top-tier security console from the enigmatic engineers of Nu-Phase. Also useful for going on the offensive.	cybersecurity console , top-tier cybersecurity, cyberattack mod, active warranty	not designed for Harnessed use
Nu-Phase Wireless Sniffer	A small, discreet device for detecting and pinpointing wireless signals in the vicinity.	wireless sniffer , analyze signal, discreet	distracted by countless other signals
Packaged custom private Domain	A private Domain, pre-customised (several templates are available), that can be "released" anywhere in cyberspace as a small pocket dimension.	custom private Domain , various amenities, fits everywhere, safe refuge	short-lived
Quicksilver Avatar Mask	A software distributed by the hacker collective Quicksilver, that scans and copies another user's avatar, allowing for Harnessed disguises.	avatar mask software , copy emotes and idle animation, library of disguises	requires many details to be precise
Shever Brute Force Exploit	A popular forced-entry software that is very effective at breaking encryption quickly but also very loud and obvious.	brute force exploit software , shatter defensive constructs, ollateral damage	conspicuous
Smarter Jack Connection Tracer	Safety-minded users who wish to avoid scams sometimes use this program to narrow down just who they are talking to and where they are located.	connection tracer , identify physical location, identify user's account, inconspicuous operation	"Stall them, I need 30 more seconds!"
Smarter Jack Identity Buffer	Violent disconnections are the bane of anyone who travels the Spirals (and Harnessed mercs). This powerful utility gives the brain a few more seconds to adjust to meatspace, which can make all the difference.	identity buffer , refocus and stay calm, quick and safe disconnection	doesn't play well with other brain augs

DRONES

A drone is any device that can be controlled from afar, usually mobile. They come in a huge variety of forms and functionalities, and most can be controlled verbally or receive commands through a connected device.

Almost all drones carry some default programs that allow them to be semi-autonomous. Unless they have a tag for it, however, it's likely rudimentary and unsophisticated. A roll is required only if the drone is asked to perform something its programming doesn't account for.

Drones are secondary characters under the PC's control. Their tags can be used as support for a PC's actions if the drone is around to help, adding its relevant tags to the action performed. Drones can also be used to handle things from afar, and in some cases the PC doesn't even need to be in the scene in order to take action through their drone. In these situations, however, it's rare that any other tag can be used in conjunction with the drone's. If needed, the MC can give the drone a *wrecked* Limit, but with it being a loadout item it usually makes more sense to burn the

tags if the drone comes under attack. See also **Operating a Drone** in the *Action Database*.

A common Consequence with drones is having them act in a way that does not align with their user's wishes.

GENERAL ITEMS

Items: *android assistant, carrier drone, surveillance drone*

Features: *anthroform, auto-stabilization, long battery life*

Flaws: *easily damaged, hardcoded, stiff controls*

ITEM NAME	DESCRIPTION	FEATURE TAGS	WEAKNESS
Acciaio Clandestine "Chirurgia V" Military Strike Drone	A sleek, stealthy drone capable of carrying impressively heavy weapons despite being able to fit in a backpack. The most common assassin drone on the market.	<i>strike drone, stealthy flight, mounted weaponry, sleek</i>	<i>mediocre recoil stabilizers</i>
Apex TB-X Swarm-Linked Microdrones	A collection of twenty 3cm drones capable of operating as a coordinated swarm or individually.	<i>swarm-linked microdrones, self-sustained flight, coordinated surveillance</i>	<i>delicate</i>
Epis Canine Companion Drone "Rex"	A canineform drone intended to be a helpful companion and support unit for paramilitary groups, often retooled as a combat drone.	<i>canine drone, attack protocol, support protocol, electronic scent detectors</i>	<i>slow reaction time</i>
NM3 Industrial Mechanoid Loader Mark II	A common sight in industrial settings, these giant, durable drones are sometimes repurposed for arena brawling or as towering weapons.	<i>industrial mechanoid loader, very strong, towering threat</i>	<i>lumbering</i>
NM3 Unfolding "Backpack" Arachnid III	When stowed, this drone looks like a hard-shelled backpack. It unfolds into a spider-like, agile drone the size of a large dog, which sees much use in urban exploration and rescue missions.	<i>backpack arachnid drone, wall crawling, enter tight spaces, durable</i>	<i>slow-moving</i>

ENHANCERS

If you've got a biological body, you can probably make it do some *crazy stuff* if you “biohack” it. The drugs available on the Megacity's markets, both regulated and over-the-counter, can kick your metabolic processes into another level – if only for a short while.

Many enhancer tags can be used to create beneficial statuses representing boosted biological functions. For example, characters who take Nitro can **Enhance** themselves to gain a status such as *nitro-reflexes*. If the drug is of low-quality (such as Nitro), once this beneficial status is removed, it's replaced with *hangover* with the same tier. See also **Performance Enhancement** in the supplement *:Otherscape Action Database*.

Enhancers can be treated as a consumable tag (**Consumable Story Tags**, page 113). When a consumable item is consumed entirely in an action, the player should burn its tag for Power to reflect the greater effect derived from its one-time use (**Burning a Tag for Power**, page 122). Consumable tags can also be used normally to provide 1 Power per tag, in which case it is assumed the PC is rationing the use of this consumable item to gain multiple uses with smaller effect.

Many drugs, especially low-quality ones, are *addictive*. This can be reflected as an Threat followed by the Consequence of getting *addicted* (with mitigation at the discretion of the MC, as usual). This status can be temporarily ignored by taking more of the drug, but it becomes relevant again once the effect wears off.

GENERAL ITEMS

Items: *downer, focuser, upper*

Features: *heightened reflexes, numbing, undetectable*

Flaws: *addictive, illegal, trippy*

ITEM NAME	DESCRIPTION	FEATURE TAGS	WEAKNESS
Anchor	This prescription drug is subscribed to people who suffer from cyberspace delirium, a common issue among people who disconnect from VR way too fast.	<i>Anchor, be here and now, negate cyberspace delirium, see through illusions</i>	<i>addictive</i>
Nitro	A common street drug that is sold in small canisters of neon-yellow color. Gives you a boost when you need it, making you faster, stronger, and psyched-up.	<i>Nitro, shake off tiredness, ignore pain, artificially excited</i>	<i>addictive</i>
Rapid healing nanobots	A number of companies produce syringes or pastes of nanobots that accelerate their host's natural healing.	<i>rapid healing nanobots, pain relief, toxin filtering, healthy glow</i>	<i>can't handle the Mythic</i>
Santos-Krupp X-2031 ("Mindsharp")	A military drug that made it to the street, Mindsharp focuses your senses to fixate on a task or read microexpressions in interrogation subjects.	<i>Mindsharp, focus on a task, sharp senses, read microexpressions</i>	<i>blindsided</i>
Sunspot	Originally a rave drug, a modified version of this hyper stimulant is used by street mercs to put themselves on high alert.	<i>Sunspot, shake off tiredness, long term drug-fueled wakefulness, focused attention</i>	<i>rebound fatigue</i>

GARMENTS & FASHION

Clothes make the merc, but maybe don't bring them into a gunfight. While some of these outfits can double as armor, in general, these are not meant to be taken into the field.

Clothing tags can be used to make an impression with a quick outcome or **Influencing** to make them *dazzled* by you, for example. Some accessories might have additional functions that assist with specific actions – or mitigate specific threats, such as being scanned or identified.

A common Consequence with complicated and smart clothes is simply having them a wardrobe malfunction. In social situations, attractive fashion can be impressive but it can also evoke *envy*. Where appropriate, clothing that shows affiliation to a faction can help to communicate and to garner their support, but can also lead to the PC being targeted by their adversaries.

GENERAL ITEMS

Items: *[corp] uniform, [subculture garment], electrifying cape, fashionable outfit, gang jacket, hoverboots, nightlife wardrobe, security uniform, telescopic eyewear, video-rig necklace*

Features: *authentic, blend in the crowd, grab attention, hidden pockets, integrated scanner, luxurious, weather-resistant*

Flaws: *expensive, flimsy, limited motion, requires recharging*

ITEM NAME	DESCRIPTION	FEATURE TAGS	WEAKNESS
Biometric masking formalwear	These clothes, which must be tailored to you, are perfect for formal occasions. They are laced with technology to prevent you from being identified in scans, possibly giving false readings.	<i>biometric masking formalwear, fancy, give false readings</i>	<i>interfere with cyberware</i>
Data crystal jewelry	Combining fashion with pragmatism, this stunning piece of jewelry contains a large-capacity data storage in the lattice of the crystals.	<i>data crystal jewelry, encryption, geotagged, stunning jewelry</i>	<i>requires a unique port to access</i>
Privacy hood	In an age of constant surveillance, this hood disrupts digital recording to blur your face and mask your profile.	<i>privacy hood, disrupt attempts to access my gear, mask my profile</i>	<i>also dampens useful network connections</i>
Smart fabric formalwear	A formal outfit made of the latest smart fabric tech, shimmering in patterns, adjusting shape, and responding to other smart fabric outfits.	<i>smart fabric formalwear, holographic emitters, wardrobe database, sharp dresser</i>	<i>wear and tear</i>

MERC GEAR

Every job requires a different set of tools. The following tags cover a wide range of gadgets, devices, and equipment that mercs may find need of in their jobs.

A common Consequence with gear is having it break (burn a tag).

GENERAL ITEMS

Items: *army knife, concealed holster, corrosive acid canister, first aid kit, gas mask, holo projector, kitbag, polymer rope, rebreather, repair kit, secured data stick, structural scanner*

Features: *durable, easily concealable, extra supplies, light*

Flaws: *breaks easily, cumbersome, exhausting, poor quality, requires setup, runs out easily, slow operation, unwieldy*

ITEM NAME	DESCRIPTION	FEATURE TAGS	WEAKNESS
Astra-10 Autocracker and Sequencer	An automated lock picking device that works on any lock, physical and electronic.	<i>autocracker, detect alarm triggers, safecracking tool attachments</i>	<i>rusted or broken locks</i>
Astra-10 Biometric Replicator	A professional forging device capable of 3D printing contacts, fingertip covers, and breath capsules to fool biometric scanners.	<i>biometric replicator, duplicate sample, small sized</i>	<i>limited by cartridge size</i>
Astra-10 Encrypted Wrist Comm	A wrist-mounted audiovisual communications unit that is linked with up to a dozen others through cyberspace.	<i>wrist comm, capture and share video, reactive encryption algorithms</i>	<i>signal interference</i>
Epis Personal Assistant AI "Leigh"	The leading companion AI on the market, these programs track user's habits to better deal with daily life. Often cracked to help with less legal operations.	<i>personal AI, organize operations, provide statistical insights, ease into new habits</i>	<i>misunderstandings</i>
Epis Portable Cybernetics Scanner	Fast scanner, handheld or upright, that detects any implants. Ostensibly used for security checks in public areas they are just as often used for street security.	<i>cybernetics scanner, detect implants, implant analysis, fast</i>	<i>very limited range</i>
KOCMOC Medkit	The standard first aid kit, featuring smart bandages, basic painkillers, synthetic skin sprays, and other fast fixes.	<i>medkit, get you back on your legs, defibrillator, here to help</i>	<i>limited supplies</i>
Nanoware disguise kit	This illegally modified 3D printer produces latex face disguises that can fool face recognition apps.	<i>nanoware disguise kit, copy sample, emergency mask repair</i>	<i>confused by non-human features</i>
Navachar Electronics "Essence" 3D Scanner	This wand-like device takes three dimensional scans of an object to create models suitable for 3D printing or inclusion in a VR.	<i>3D scanner, measurements and details, multispectrum scan, quick processing</i>	<i>objects with multiple parts</i>

ITEM NAME	DESCRIPTION	FEATURE TAGS	WEAKNESS
NM3 Machinist's Helm	Headset and visor that x-rays machines and devices, displaying internal schematics and matching them with its own internal database.	<i>machinist's HUD, understand hidden features, large design database, get your hands dirty</i>	<i>metal shielding</i>
Osprey Adaptive Climbing Gear	These gloves and boots feature micro-adhesion surfaces to help with climbing.	<i>adaptive climbing gear, grappling gun backup, polymer rope</i>	<i>moisture</i>
Osprey Artificial Gill Breathers	A device that either straps over your mouth or is held between teeth, rapidly processing water into oxygen to allow you to breathe underwater.	<i>artificial gill breathers, dive computer, at home in water</i>	<i>dirty water</i>
UrbanWar Grappling Hook	Almost every Megacity district has more than enough highrises, towers and utility poles to justify the use of a grappling hook in tactical warfare.	<i>grappling hook, grippy climbing rope, magnetic hook, swing between buildings</i>	<i>crumbling anchoring</i>

SOURCE-TOUCHED ITEMS

The following are mostly “generic” Loadout items that grant Mythic powers can be Sources in and of themselves, but are more likely to be items Touched by a Source: either items created by a Source or items exposed to a Source.

Examples can be a vial with the blood of a Mythic being that emerged out of a Thin Place, or a weapon blessed at such a place; a talisman prepared with the right Esoteric knowledge; a garment woven in a magical Relic loom; a legendary drug produced by an Avatar; and so on.

The following are generic Sources that can be matched with many different Mythoi. Such items are relatively plentiful in the merc world, and therefore are just as likely to be found in the hands of the crew's opposition.

When a Source is first examined, its true nature and powers might not be obvious; the MC can ask for a roll to see whether the PCs identify what a Source does. See also **Identifying a Source** in the supplement *:Otherscape Action Database*.

Sources can do almost anything, and so their tags can also have countless uses, depending on the Source itself. Most can be used to achieve a “mundane” outcome – one that can normally be achieved with non-magical abilities – adding to tags from other sources, but some Sources might also be able to create an effect that is wholly magical. Such magical actions can benefit only from the Sources's own

tags, and perhaps some suitable tags from the PC's Mythos themes. Sources can also grant the ability to mitigate a danger that the PC would otherwise be unable to.

Some Sources, such as potions, can be treated as consumable tags (**Consumable Story Tags**, page 113). When a consumable item is consumed entirely in an action, the player should burn its tag for Power, to reflect the greater effect derived from its one-time use (see **Burning a Tag for Power**, page 122). Consumable tags can also be used normally to provide 1 Power per tag, in which case it is assumed the PC is rationing the use of this consumable item to gain multiple uses with smaller effect.

A common Consequence with Sources is to have them behave in a manner fitting their Mythoi but against the PC's wishes, such as by inflicting *cursed* or *charmed*.

GENERAL ITEMS

Items: *blessed water, flight-giving feather, ghost-appeasing chant, girdle of giant's strength, good luck talisman, invisibility ring, ironskin salve, locator spell, lulling lyre, magebane dagger, monster-slaying ointment, silent-kill whetstone, spider-climbing charm, spirit-binding salt, suit of beguilement, wristband of flames, wyvern blood rejuvenating shot*

Features: *discreet, long lasting, stronger [at time / in place / if condition], stronger against [being], stronger against mundane, stronger against tech*

Flaws: *activated with blood, attracts [being], easy to dispel, needs recharging, noticeable, only works [at time / in place / if condition]*

ITEM NAME	DESCRIPTION	FEATURE TAGS	WEAKNESS
Aegis	A replica of the shield carried by the gods of ancient Greece, protective against nearly any blow.	magical shield , deflect attack, awful to behold, stand your ground	cumbersome
Demonic pendant	This necklace bears an evil sign, which connotes bad omens but also a dark and powerful force.	demonic pendant , inflict bad luck, command malicious spirits	weaker in daylight
Glass of True Vision	Looking through this rounded shard of sea glass lets you see through illusion and the true form of shapeshifters.	glass of true vision , see through illusions, penetrating stare	takes a moment for the vision to clear
Healing potion	A magical cure-all, an excellent but costly solution to open wounds and broken bones.	healing potion , close wounds, mend bones	cyberware
Leyline map	An ancient map showing the convergence points of various mystical powers.	leyline map , helpful navigation, tap earth energies	outdated
Otherworldly contract	A tightly worded contract with a devil, a fae, or some spirit, to provide a service.	otherworldly contract , summon helpful familiar, preternatural advice, careful articulation	small print and loopholes
Prayer beads	Commonly used to count the prayers you have made, this Source strand has been blessed or otherwise consecrated.	prayer beads , protection from demons, blessed guidance	sarcastic user
Prayer beads, explosive	Demonic beads, full of negative energy, ready to be thrown. You can see the black vapors and hear the cackling.	explosive prayer beads , demonic fire, blast radius, disrupts magic	indiscriminate damage
Somber markings	Makeup made from human ash, used to mark the face and offer protections against ghosts. Occasionally provides visions of the lands of the dead.	somber markings , ghost placation, see into the underworld	creepy
Trapped spirit	Within this glass sphere is a trapped vicious spirit. Shattering the glass will release its wrath, hopefully towards your enemies.	trapped spirit , telekinetic assault, hectic scream	indiscriminate targets

VEHICLES

You might have bought yourself a giant truck, but unless you keep it maintained and fed with fuel (by Loading Up), it's just sitting there. Vehicles can also be rented, stolen, or borrowed ("I'll give it back exactly as it was, I promise!").

Vehicle tags are used mainly in a chase or a firefight, or when traversing a landscape during a journey. Driving or flying in normal conditions does not require a roll – you narrate moving together with another action (see **Narration**, page 85). Roll only when piloting is difficult or dangerous because you're under fire, maneuvering in tight alleys, not sure where to go, landing in difficult conditions, bypassing a road hazard, etc.

If needed, the MC can give the vehicle a **wrecked** Limit, and the vehicle can later be **Restored** with appropriate skills and tools.

Common Consequence with vehicle handling is temporarily losing control or losing speed during a chase or escape.

GENERAL ITEMS

Items: *chopper, gyrocycle, hand glider, hover car, hoverboard, jet ski, parachute, personal aircraft, rusty ground car*

Features: *armored, firewalled, jet fuel injection system, neural piloting*

Flaws: *accident-prone, guzzler, poor handling, stolen*

ITEM NAME	DESCRIPTION	FEATURE TAGS	WEAKNESS
Gyeong Motors V-260 Sports Car	Fast and agile, this particular model features many useful integrated devices.	<i>sports car, superior handling, integrated devices, symbol of wealth</i>	<i>minimal safety features</i>
NM3 Armored Utility Car Mark V	A secure transportation option with multi-layered armor panels and active threat sensors.	<i>armored car, low center of gravity, active threat sensors, don't even try me</i>	<i>slow and steady</i>
NM3 Hawk-2 VTOL flier	Market leader among paramilitary groups, this vertical take-off and landing (VTOL) vehicle is trusted to do almost any job.	<i>VTOL flier, thick armor, long flights, reinforced against EMP</i>	<i>strong winds</i>
Qhaos Pro-Level Hoverboard	A widely known name in vector-thrust hoverboards. Designed to soar several meters above the ground, the daring go even higher.	<i>hoverboard, daredevil tricks, cool factor</i>	<i>sharp turns</i>
Taipan E5X "Venom" Motorbike	A favorite among street warriors, thanks to its built-in weapon mounts.	<i>armored motorbike, fast in the streets, weapon mounts, drive and shoot</i>	<i>weak chassis</i>

WEAPONS

There must be a physical limit to the number of firearms a single person can carry, and we are sure you're going to do your best to find out what it is.

Weapons are only rarely inconspicuous. That being said, in many parts of the Megacity it's not rare to see people openly carrying a sidearm, and bystanders won't bat an eye as long as the person appears respectable and the weapon isn't *too* big.

Weapon tags are used almost exclusively when attacking.

A common Consequence with weapons is having a jam (burn the tag).

GENERAL ITEMS

Firearms: *assault rifle, heavy pistol, hunting rifle, machine-pistol, minigun, pocket pistol, rail gun, revolver, shotgun, sniper rifle, submachine gun, tactical rifle, taser*

Cold Weapons: *army knife, baton, bayonet, broadsword, ceremonial dagger, composite bow, crossbow, garrote, katana, knucklebuster, morningstar, rescue ax, shurikens, spear, staff, whip*

Explosives: *[frag/stun/smoke/sleep gas] grenades, airstrike laser pointer, anti-personnel mine, grenade launcher, rocket launcher*

Features: *custom-made, defensive, easily concealed, extreme range, full-auto, hair trigger, high caliber bullet, intimidating, IR sight, large magazine, mono-molecule edge, quick reload, smart targeting, telescopic sight, unarmored targets, untraceable, wide spread*

Flaws: *cheap make, cumbersome, inaccurate, often jams, tends to rust, unwieldy*

ITEM NAME	DESCRIPTION	FEATURE TAGS	WEAKNESS
Acciaio Clandestine "Pop Out" Articulated Sidearm and Brace	A metal bracer that fits over the forearm which activates with a gesture to unfold into a flechette pistol pressed into your palm.	<i>sidearm and brace, flechette ammo, quick draw, surprise factor</i>	<i>thick sleeves or gloves</i>
Acciaio Clandestine "Riservato II" Silenced Pistol	With built-in gas absorbers and a frictionless barrel, this pistol barely makes any detectable sound when fired.	<i>silenced pistol, point blank shot, concealable</i>	<i>inaccurate at long distance</i>
Elysian Blades Monofilament Longsword	The edge of this alloyed steel blade is lined with a synthetic wire just a few molecules wide, the sharpest edge that machines can make.	<i>monofilament longsword, cut through armor, custom scabbard</i>	<i>must be handled very carefully</i>
Gorts & Jasper 81-V Shotgun	Designed for an "old-fashioned" feel but constructed using modern materials, this short-barrelled shotgun is incredibly popular.	<i>shotgun, wide spread, underbarrel grappling hook, old-fashioned</i>	<i>recoil</i>

ITEM NAME	DESCRIPTION	FEATURE TAGS	WEAKNESS
Gorts & Jasper KS-125 "Kiss Kiss" High-Precision Rifle	A long-range rifle known for its reliability and modular design.	high precision rifle , long range, telescopic thermal sight, reliable	hard to conceal
Happy Hunting! P-23 Disposable Sidearm	A cheap plastic pistol sold in vending machines, designed to break down shortly after being fired.	disposable pistol , easily concealed, easily disposable, neon punk look	cheap make
Kikuchi Corp DS "Deep Clean" Minigun	A large, portable mounted weapon with a drum magazine, this minigun fires off thousands of rounds every minute.	minigun , break through cover, armor piercing, scary big	not exactly "aimed", more like "pointed toward"
Kikuchi Corp DX "Bleach" Flamethrower	A compact flamethrower with a metal-wrapped feed hose and a lightweight backpack of fuel cells.	flamethrower , ignite flammable material, control the heat	fuel explosion risk
UrbanWar Paralyzing Taser	A small, compact electroshock weapon that fires paired supercharged barbs, for non-lethal takedowns and electrical mayhem.	taser , cybernetics scrambling, maintain contact for extra charge	grounded targets
UrbanWar Retractable Staff	A carbon fiber 1.5m staff that telescopes down to a length small enough to fit in your pocket.	retractable staff , mechanical leverage, carbon fiber construction, surprise factor	needs room to swing
